CO-ENROLMENT:

The DEXTA TMG has agreed to co-enrol with OTTER, SNAP-PY and Womb to World. We are currently in progress to have the co-enrolment agreement signed by relevant parties. Please do note that co-enrolment is not permitted until the agreement is signed. Keep your eyes out for an email communication or the DEXTA website for the latest co-enrolment status.

Screening log update: A quick reminder when completing the screening log: if an eligible baby was missed and not recruited, please record under "Trial not discussed with parents before discharge". We are considering an update to the screening log to replace this option with "Missed", which should make recording these cases clearer. If you are unsure which option to select, please refer to the screening log guidance or contact the DEXTA trial team for clarification.

This wording was mandated by the MHRA and should not be interpreted as excluding babies who have had, or may require, surgery. Having surgery does not in itself make a baby ineligible for DEXTA. Babies who may require surgery or additional pain relief can be included if they meet the other eligibility criteria. Please use clinical judgement when assessing eligibility and contact the DEXTA team if unsure.

Important!

DROP IN SESSION - October

Open

10:00 - 10:30

All
Locations

TBC

API Scheme: We now have 9 HCPs registered across 7 sites, with 1 having completed the Associate PI Scheme. Following registration, please email the DEXTA team your GCP certificate and up-to-date CV to complete the registration process.
